

ST, AGNES FRATERNITY KIHANI PARISH

OUR DEAR VISITORS

WELCOME TO KIHANI.

SITUATION BEFORE AND AFTER ACQUIRING WATER IN OUR SOCIETY.

It's been a holific situation since our society has been in a great struggle and in a tearful moment due to shortage of water .

Schools have been in crying for water, fetching it from stagnant wells, pregnant mothers have been casualties in this issue since many were suffering from unconditional diseases spread through contaminated water .

Many had lost their lives, men and women, elders and young have been crying for thirsty due to unclean water suitable for drinking.

Many of families had broken up because of unsafe water in our community, young children had suffered Diahorhea and cholera in this society due to same issue, Some had reached to the extent of displacing themselves out of this community due to water shortage since their animals were severely dying of thirsty, School children could not wash their clothes and uniforms not until it rains, Skin diseases had encroached peoples skins like, skin rashes, pimples, brown hair, etc due to unclean water in our society.

Our Dear visitors,

All these have been curbed down and solved since change is a fact of life and water being source of life, it's a great pressure on appositve note that
